

SUMEDH PATIL

Product Security Engineer | DevSecOps | Cloud Security

Pune, Maharashtra • +91 88058 72651 • sumedhpatil6342@gmail.com • linkedin.com/in/sumedhp

PROFESSIONAL SUMMARY

Results-driven Product Security Engineer with 4+ years of experience securing cloud-native ecosystems across AWS, Azure, and GCP. Holds a Master's degree in Information Security and an AWS Certified Solutions Architect credential. Specializes in embedding security throughout the SDLC via DevSecOps automation, threat modeling, SAST/DAST tooling, IaC security, and end-to-end vulnerability management. Proven track record of reducing organizational attack surface, accelerating DevSecOps maturity, and delivering measurable security outcomes in fast-paced agile environments.

CORE SKILLS

Cloud & Infrastructure Security: AWS · Azure · GCP · IAM Hardening · VPC Security · Cloud Posture Management · CSPM · CWPP

Application Security & DevSecOps: OWASP Top 10 · Threat Modeling · SAST / DAST · SCA · CI/CD Security · Secure SDLC · IaC Security · Container Security · API Security

Security Operations & Intelligence: SIEM Analytics · Threat Detection & Hunting · Incident Response · Vulnerability Management · Penetration Testing · Risk Assessment

Compliance & Tooling: ISO 27001 · SOC 2 Type II · NIST CSF · PCI-DSS · Bash · Python · Terraform · Checkov · Git · GitHub Actions · Jira · Microsoft Defender for Cloud · GHAS · Snyc · Prisma Cloud

WORK EXPERIENCE

Product Security Engineer | Conga

Pune, Maharashtra | May 2024 – Present

- Hardened multi-cloud security posture across AWS, Azure, and GCP by deploying Microsoft Defender for Cloud as the primary CSPM solution — achieving 85%+ Secure Score across all subscriptions and reducing high-severity recommendations by 42% within 6 months.
- Engineered and enforced Infrastructure-as-Code (IaC) security policies using Terraform and Checkov, embedding pre-deployment security gates that blocked 95% of non-compliant resources from being provisioned across AWS and Azure environments.
- Built and operationalized an end-to-end Vulnerability Management program covering 200+ cloud assets across AWS (EC2, EKS, Lambda, S3) and Azure (VMs, AKS, App Services) — integrating Defender for Cloud findings with Jira for risk-based prioritization and reducing MTTR for critical CVEs from 45 days to under 12 days.
- Deployed and tuned Microsoft Defender for Cloud workload protections (Defender for Servers, Defender for Containers, Defender for Storage, Defender for APIs) across hybrid environments, enabling real-time threat detection and cutting alert noise by 60% through custom suppression rules and automation playbooks.
- Implemented a GitHub Advanced Security (GHAS) program — enabling secret scanning, CodeQL code scanning, and dependency review across 50+ repositories — achieving 100% secret remediation coverage and eliminating hardcoded credential exposure within 30 days of rollout.
- Designed and integrated automated CI/CD security gates (SAST, DAST, SCA, IaC scanning, container image scanning) into GitHub Actions pipelines, shifting security left and reducing production security defects by 40% while maintaining zero pipeline disruption to engineering velocity.
- Automated cloud security operations using Terraform modules and Python/Bash scripts for continuous compliance enforcement, auto-remediation of IAM misconfigurations, and scheduled vulnerability scans — saving 20+ manual hours per week.
- Led threat modeling (STRIDE) for new SaaS product features, partnered with GRC for SOC 2 Type II and ISO 27001 audits with zero non-conformances, and delivered developer security training that reduced recurring OWASP Top 10 vulnerabilities by 30%.

Cloud Security Engineer | CloudThat

Bengaluru, Karnataka | Jan 2022 – Apr 2024 | Promoted from Cloud Security Research Intern

- Architected and deployed security-first cloud infrastructure on AWS and Azure for 10+ enterprise clients, including IAM hardening with least-privilege role design, network segmentation, and security-group governance, reducing attack surface by an average of 45%.
- Performed comprehensive cloud security assessments for migration workloads across AWS Well-Architected Framework security pillars, identifying and remediating 80+ critical misconfigurations prior to production go-live.
- Implemented IaC security scanning (Terraform + Checkov) in pre-deployment pipelines, preventing insecure infrastructure from being provisioned and achieving 95% policy compliance across managed environments.
- Deployed and configured AWS GuardDuty, Security Hub, and Azure Defender, enabling proactive threat detection and automating 70% of alert triage through custom Lambda-based response playbooks.
- Authored 15+ standardized security runbooks covering incident response, access reviews, and cloud hardening procedures, improving team response consistency and reducing onboarding time by 40%.
- Contributed open-source threat intelligence research on adversary TTPs as a Cybersecurity Researcher at Virtually Testing Foundation, publishing findings mapped to the MITRE ATT&CK framework.

PROJECTS & ACHIEVEMENTS

Wildlife Crime Prevention Platform — Zoohackathon Winner

Engineered a full-stack solution leveraging ML-based image recognition and geospatial analytics to detect and disrupt wildlife trafficking networks. Recognized as the winning entry at the Mumbai Zoo Hackathon, outperforming 20+ competing teams.

Cybersecurity Instructor — IMS Proschool (2021–2022)

Delivered security-fundamentals curriculum and hands-on lab sessions to 100+ professional learners, covering network security, cloud security basics, and ethical hacking principles.

EDUCATION

Master of Computer Applications (MCA) | Jain (Deemed-to-be University) | 2020 – 2022 | *Specialization: Information Security & Management Services*

Bachelor of Computer Applications (BCA) | Sandip University | 2017 – 2020 | *Specialization: Cloud Technology & Information Security*

CERTIFICATIONS

- AWS Certified Solutions Architect — Amazon Web Services
- Certified Cloud Security Engineer — Cloud Security Alliance (CSA)
- Microsoft Security, Compliance & Identity Fundamentals (SC-900) — Microsoft
